

POG IS SEEKING

PARTNERS TO CO-DEVELOP REFERENCE STANDARDS FOR FLUORESCENCE MICROSCOPY AND DIAGNOSTICS

YOUR APPLICATIONS

Visualization and diagnostics of fluorescent structures & Reference standards for metrology and quality assurance

If joint development of reference standards that are tailored to your needs is of interest – Don't hesitate to contact POG.

OUR SKILLS FOCUSED TO YOUR NEEDS

MANUFACTURING OF OPTICAL COMPONENTS

- Spherical and plano optics of common optical materials
- Cemented Groups
- Specials

OPTICAL SYSTEM ASSEMBLY

- Design, simulation, development and testing of optical systems
- Manufacturing of assemblies to your specifications in prototype to serial production

MICROSTRUCTURED OPTICS

- Calibration Targets
- Micrometer Scales
- Resolution Targets

TECHNICAL SERVICES

- Coating layout and Coating Services
- Alignment turning

COMPANY

POG Precision Optics Gera develops, produces and distributes client-specific, precision optical components and systems for applications covering the entire spectral range.

POG's product portfolio varies from conventional precision optical components and microstructures to complex optical and optoelectronic systems that are utilized in machine vision & lighting, metrology, industrial image processing, medical, sports optics and

military applications. Owing to the high quality standard and competitiveness of our products and services, POG has won a worldwide reputation as a technology company leveraging valuable partnerships with research institutions in Germany and abroad.

POG is DIN EN ISO 9001 certified.
